

Start today for tomorrow's career

Dental graduates are health care professionals to diagnose and treat oral diseases and infections. They restore cavities, perform scaling and root canal treatment, extract and replace missing teeth, place implants and perform other surgical and non surgical procedures. Dentists play an important role to improve the oral health care of the community by providing information and awareness on proper oral health care practices.

Graduates can continue their career as general practitioner in their respective countries, by passing respective exams or continue post graduate training.

Become a dentist and promote oral health care

Dentistry is the evaluation, diagnosis, prevention and treatment of diseases, disorders and conditions of the oral cavity, maxillofacial area and the adjacent and associated structures, and their impact on the human body.

Apply online and attach the following documents

A radiant smile is a precious gift you can offer.

RAKMHSU's Bachelor of Dental Surgery (BDS) is a 5 year Program. First 2 years are for Basic Sciences. In 3rd year pre-clinical components are elaborated to prepare students to efficiently work on patients. This is followed by 2 years dental clinical training where students provide comprehensive dental care to patients under the supervision of qualified staff. Internship is mandatory for expatriates who wish to practice dentistry in UAE. However, the students who wish to continue for internship/post-graduation in other countries have to fulfill the requirements of that country.

The curriculum has been developed to cultivate internationally competent oral health care professionals. They will be specially trained to improve the oral health status of the community through outreach programs, and contributing research to the understanding of its biological, behavioural, biomedical and clinical aspects.

Furthermore, the curriculum prepares dental students for evidence-based dental practice in a changing health care environment, acquiring basic medical and dental knowledge and the skills that will allow the professional, ethical and humane practice of dentistry.

The program is focused on promoting the acquisition of expertise, attitude and behaviour that facilitate effective and appropriate interaction with patients and colleagues. Its goal is to produce caring, knowledgeable, competent and skilful oral specialists who recognize and accept the obligation to practice in the best interests of patients at all times.

EDRAK Residential Halls for students
